EXPERIENCE

Over thirty years experience in forensic architecture, accessibility and architecture.

Forensic Architecture: Technical analysis of architectural services: pre-construction services, facility programming, building design, bidding services, construction documents, construction administration and post-construction services. Analysis of the architect's standard of care and errors and omissions. Buildings compliance with codes, ordinances and industry standards. Construction defects, cause and origin of construction defects, failure analysis (water intrusion and roofing failures). Expert witness and litigation support.

ADA, ANSI A117.1 and TAS: Accessibility design and building adaptation. Analysis of buildings and sites for compliance with ADA, ANSI A117.1 and TAS. Texas Accessibility Standards plan reviews and inspections.

Architectural: Management experience: project coordination of multiple projects, client development, and firm management; manage a multi-disciplinary team, quality control, risk management, personnel management and contract negotiations. Project experience includes: design and planning, project development: programming, schematic design, design development, construction documents, coordination of consultants, bidding and negotiation, construction administration and post-construction services.

Real Estate: Experience in residential and commercial real estate.
